

Accessing Respondus on Campus Lab Computers:

1. Do not log into Canvas/Carmen from a web browser or link in a webpage. If you do, it will give you an error that Respondus cannot be installed.
2. Our labs have preinstalled Respondus links, that point directly to the instances of Canvas/Carmen that our campus uses.

3. Once you click on the link, it will have you log in through the COTC or OSU login system (name-# or name.# , respectively).

4. Navigate through Canvas/Carmen to find the test or quiz that requires Respondus and click into it from the newly opened lockdown browser window.
